

Introduction to Apache Spark

1. Develop an Apache Spark implementation package that supports the following functionalities:
 - a. Install Apache Spark in Ubuntu
 - b. Perform basic Math, Array and String manipulation
 - c. Load a dataset, read and perform data pre-processing

Learning Resources:

- a. <https://spark.apache.org/docs/latest/>
- b. <https://aws.amazon.com/what-is/apache-spark/>
- c. <https://www.databricks.com/glossary/what-is-apache-spark>
- d. <https://www.ibm.com/think/topics/apache-spark>

Moodle Submission Logistics:

- You need to have the following files in a zipped folder with the naming format:
"AS_<<roll_no>>"
 - (a) Your code files along with graphs as the outcome with proper naming extension
 - (b) Your dataset/s
 - (c) any reference materials you have used.

---THE END---
